## PROJECTS

**AI-Powered Recruitment & Interview Intelligence Platform**
*Java | Spring Boot | React | PostgreSQL | LLM | NLP | REST APIs*

- Built an end-to-end recruitment platform for resume analysis, candidate-job matching, technical interview generation, and personalized feedback.
- Developed Spring Boot REST APIs with role-based authentication, PostgreSQL persistence, and a React recruiter dashboard; integrated LLM services for candidate evaluation.

**GraphRAG Knowledge Intelligence Assistant**
*Python | LLM | GraphRAG | RAG | Embeddings | Vector Database | FastAPI*

- Built a knowledge assistant combining vector retrieval and knowledge-graph relationships to answer multi-hop questions from connected documents.
- Implemented document ingestion, embeddings, graph construction, hybrid retrieval, and grounded LLM responses with source references.

**Smart Campus Service Management System**
*Java | Spring Boot | Spring Data JPA | PostgreSQL | REST APIs*

- Developed a modular service-request platform with REST APIs for request creation, assignment, status tracking, and resolution workflows.
- Implemented JPA relationships, validation, exception handling, pagination, search, and role-based access control using a layered Spring Boot architecture.

**GeoTrack Pro — Geofencing Attendance System**
*MERN | React | Node.js | Express.js | MongoDB | Geospatial APIs*

- Built a geofencing attendance platform that validates staff check-ins against authorized locations using geospatial distance checks.
- Developed React interfaces and Node.js/Express APIs with MongoDB persistence, role-based workflows, attendance tracking, maps, admin controls, and reporting.

**Project Management & Collaboration Platform**
*MERN | React | Node.js | Express.js | MongoDB | REST APIs*

- Developed a full-stack project management platform for projects, tasks, queries, responses, resources, and technology stacks.
